

<u>Health Systems Information Assurance Analyst – Charleston SC / Washington DC</u> <u>Metropolitan Area</u>

Job description:

Security Risk Solutions, Inc., a professional information security services company in Mt. Pleasant, SC, seeks a Health Systems Information Assurance (IA) Analyst specializing in and capable of supporting various Federal and commercial health system environments. Widespread adoption and meaningful use of health information technology (IT) is one of the foundational steps in improving the quality and efficiency of health care. The appropriate and secure exchange of information is a critical enabler of a high performing health care system. Therefore, the candidate for this position will possess in-depth knowledge of applicable Federal law (e.g., HIPAA, HITECH Act), processes and activities (e.g., Breach Notification, Risk Assessments), standards initiatives (e.g., HHS Data Segmentation for Privacy [DS4P], NIST Special Publications, Health Level Seven [HL7]), and related security control compliance measures necessary to ensure the confidentiality, integrity, and availability of Electronic Health Records (EHR) and associated data. Key attributes of a highly-qualified candidate include:

- Demonstrated experience conducting research and writing detailed reports.
- Demonstrated knowledge of Health IT Standards such as the Clinical Document Architecture (CDA) R2 standard and the inner-workings of EHRs and Personal Health Records (PHRs) in terms of the way they maintain clinical data.
- Detailed knowledge and experience within HL7 development efforts.
- Expertise with the standards development organizations, with an emphasis on privacy and security activities.
- Experience with test procedures & implementation standards.
- Ability to draft change documents and translate standards work between policymakers and technical implementers.
- Experience working with diverse stakeholders and helping reach consensus on key issues where there are differences of opinion, including reaching out directly to stakeholders to discuss viewpoints and find common ground.
- Demonstrated understanding of the initiatives of Department of Health and Human Services (HHS) Office of the National Coordinator (ONC), Office of the Chief Privacy Officer and Office of Science & Technology (OST).
- Understanding of Standards and Interoperability.

The candidate must be able to show direct experience evaluating standards constructs as relates to Health IT, and detailed process- and technically-oriented standards development expertise. The candidate will further demonstrate hands-on experience identifying and executing requisite compliance of operational, management, and technical control measures necessary to operationalize resulting standards within Commercial and Federal Health IT environments.

Candidates must have excellent written and verbal communication skills, be able to represent the company in the best light possible, be willing to travel, and be able to interact confidently with individuals at every level of each organization.

Qualifications:

- Bachelors degree required; B.S. in IT, Information Systems, or related field desired, and at least 6 years' experience in contributing to and operationalizing health IT standards; OR
- Minimum of 8 years technical experience with development and implementation of data standards such as those brokered within a HL7 context.

- Hold or be able to attain 1 or more of the following security certifications: CISA, CISSP, CISM, Security+
- Hold or be able to obtain a relevant Health IT certification such as the CPHIMS.
- US Citizen with ability to obtain security clearance is required

Salary: Commensurate with experience.

Application Procedures:

Cover letter, salary requirements, and resume should be submitted to: jobs@securityrs.com

Additional Information:

This is a key position in an established and growing organization with an excellent reputation. Opportunities for growth are substantial, including the potential to build and manage a team supporting multiple clients and contracts. See www.securityrisksolutions.com for more information about the company.

E-Verify:

If you are selected for this position, the documentation that you present for purposes of completing the Department of Homeland Security (DHS) Form I-9 will be verified through the DHS "E-Verify" system. Federal law requires DHHS to use the E-Verify system to verify the employment eligibility of all new hires, and obligates the new hire to take affirmative steps to resolve any discrepancies identified by the system as a condition of continued employment. Security Risk Solutions, Inc. is an E-Verify Participant.
